

# Xanura: FieldCommander® software option

Xanura is a system for devices and sensors based on the A10 Powerline communication technology.

A10 is a powerline based communication which is actually an improved version of X10.

This software option is a protocol converter, enabling the FieldCommander software to send/receive commands to/from Xanura.

### Applications

#### Communication

- your Xanura-devices can now be extended with the FieldCommander communications options, like email; FTP; SMS or even MMS.

#### Visualization

- Using FieldCommander and this software option it is now easy to link your Xanura devices and generate a webpage displaying the system status.

#### Integration

- your Xanura system can now be integrated with other systems.

#### Monitoring, alerting and reporting

- monitor Xanura and extend Xanura devices to alerting and reporting possibilities using the FieldCommander technology.

#### FieldCommander script

- script example included
- support for many dedicated FieldCommander functions included.

Some Xanura/A10 transmitters and receivers

### System requirements:

#### Communication

- at least 1 free RS232 communication port is required
- **FieldCommander software**
- 1 free convertercomponent in your FieldCommander software is required .

#### Important !

Option must be ordered with a FieldCommander system. Option software will be installed on 1 FieldCommander system. Several options can be installed on 1 FieldCommander system. For max. number of options, please check your system spec.

Xanura is a trademark of Eaton Holec bv.

A10 is a trademark of Advantech Control Technologies Inc.
