

HMI + intercom console HMI421x: Web userinterface+IP-phone with built in 12/15" LCD/TS

Highlights

The HMI421x is intended for applications where a modern user interface is required. This device is great for user interfaces with touchscreen and audio communication like door stations.

Visualization, intercom and access control is very popular with this model.

The included HMI-software is a complete toolset for your project applications. You can combine it with an I/O controller like a FieldCommander.

Applications

- Doorstation; Door intercom system
- Entrance controller with doorphone
- Visualization of building
- Extra Userinterface for FieldCommander I/O controllers.

Webcontroller with software Framework for e-Applications

FieldCommander technology is a platform to create IP-based(web) applications. With the included HMI embedded software tools it is easy to setup userinterfaces and video/audio communication.

Reliable, flexible and easy to use

Based on the FieldCommander hardware platforms, with fanless technology and solid state disks and advanced -and in the market already proven- software the result is a reliable but still flexible solution.
